

## **Lab 2 – Extension**

Step 1:- Login to loki.ist.unomaha.edu and navigate to public\_html

Unix Command: - cd public\_html

Step 2:- Now inside public\_html navigate to CIST1300-001

Unix Command: - cd CIST1300-001

Step3:- Now type in Unix git pull

Unix Command:- git pull

Step4:- It will ask your git lab credentials

Step6:- If credentials are correct, you should see a message saying Already-up-to date

Step 7:- Now lets check git status

Unix Command:- git status

Step 8:- Navigate to the Lab2 folder and add an HTML attribute in the index file, you can add any attribute of your choice. Make sure the attribute for that HTML elements works.

Unix Command:- cd Lab2

Step 9:- Next let's add files to stage folder using git

Unix Command:- git add.

Step 10:- Now lets check git status

Unix Command:- git status

Step 11:- Now let's commit all our changes

Unix Command:- git commit -m "Lab2 final submission"

Step 12:- Do publish-public-HTML and see the attributes work,

Unix Command – publish-public-HTML

Step13:- Finally if everything works push your changes from Loki.

Unix Command:- git push origin master
